

MDV PROGRAMME

The MDV elective provides essential information for students considering applying to university for medicine, dentistry, or veterinary science. Participants will explore various course offerings, admission tests, ethical considerations, volunteer opportunities, and work experience. Additionally, discussions will cover current medical news, and students will begin practising for their UCAT tests and university interviews.

YEAR 12

The program starts in year 12, welcoming all students interested in a career in medicine, dentistry and veterinary science. A variety of activities will cater to the needs of this dynamic and evolving field. Along the way, you will connect with expert tutors, medical professionals, and new peers!

YEAR 13

In year 13, you will receive individualised support throughout the application, interview, and offer process.

Guidance from medical schools at prestigious universities, helping you establish valuable connections for the future.

UNIVERSITY APPLICATIONS

Personalised support for interview preparation, including both panel and MMI (multiple mini interviews) to boost your confidence.

Structured preparation for the UCAT pre-interview test, with access to the Medic Portal, a leading resource for aspiring medical students.
